INDEX TO VOLUME 290

July–December 1970

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

Adhesion. The physical basis of adhesion (Orowan), 493

Aeronomy. Atomic processes in the Polar Cap (Green & Strickland), 227

Analysis, structural, by partial decomposition. Structural analysis by partial decomposition (Rubinstein & Simonce), 429

Analytic expressions for sensitivity of distributed networks. An analytic approach to low sensitivity design of active distributed RC networks (Bello & Ghausi), 365

Applications of approximation theory. Constrained synthesis of electrostatic fields (Yavin & Even), (BC), 161

Applied mechanics. The whirling motion of elastic shafts with internal damping (Pipes), (BC), 67

Approximate methods. Least-squared error polynomial approximation methods for solving certain nonlinear differential equations characterizing some electric circuits and other nonlinear physical systems (Garde), 1

Atomic processes. Atomic processes in the Polar Cap (Green & Strickland), 227

Automata theory. Decomposition of simple goal-seeking automata (Yeh), 419

Automated testing. The use of emerging materials (Tsai & Lovelace), 487

B

Beacon. Scintillation effects on satellite signals observed through the polar ionosphere (Aarons, Müller and Zuckerman), 315

Birefringent coatings. Study of birefringent coatings treated as thick plates (Amba-Rao), 409

Book Reviews

Becker, R. S.: Theory and interpretation of fluorescence and phosphorescence, 167

Bucy, R. S. and P. D. Joseph: Filtering for stochastic processes with applications to guidance, 473

Canon, M. D., C. D. Cullum, Jr. and E. Polak: Theory of optimal control and mathematical programming, 76

Clegg, J. C.: Calculus of variations, 78

Cooper, B. E.: Statistics for experimentalists, 167

Donocik, R.: Theory of phase-controlled oscillations, 172

Book Reviews (continued)

Ghausi, M. S. and J. J. Kelly: Introduction to distributed-parameter networks with applications to integrated circuits, 77

Gregory, M. S.: Introduction to extremum principles, 171

Hovanessian, S. A. and L. A. Pipes: Digital computer methods in engineering, 75

Kerker, M.: The scattering of light and other electromagnetic radiation, 400

Kupsch, W. O.: Polar research—A survey, 325

MacLeod, H. A.: Thin-film optical filters, 474

Mahaux, C. and H. A. Wiedenmuller: Shell-model approach to nuclear reactions, 171

Margenau, A. and N. R. Bestner: Theory of intermolecular forces, 403

Rochstim, A. R. (edited by): Kinetic processes in gases and plasmas, 473

Runcorn, S. K. (edited by): The application of modern physics to the Earth and planetary interiors, 170

Srinivassan, S. K.: Stochastic theory and cascade processes, 399

Strickland, A. C. (edited by): Annals of the IQSY, Vol. 3: The proton flare project, 168

Vol. 5: Solar terrestrial physics: Terrestrial aspects, 169

Weaver, L. E.: Reactor dynamics and control: State space techniques, 402

Whipple, F. L. and C. Lundquist: Star atlas of reference stars, 474

Bounded wave transmission. Bounded wave transmission in nonuniform lines for pulse input (Tagata), (BC), 393

Brittle structures, analysis. Finite element analysis in brittle material design (Gallagher), 523

C

Cable dynamics. Dynamic response of single cables with initial sag (Soler), 377

Catastrophic failure. The use of emerging materials (Tsai & Lovelace), 487

Choice of materials. Design considerations in the choice of materials (Harris), 583

Circular plate response. Stability of circular plates subjected to moving loads (Mote, Jr.), 329

VOL. 290 1970

Combinatorial theory. Enumeration of spanning trees containing given subgraphs (O'Neil), (BC), 389
Composite media. Heat transfer in composite media subject to distributed sources and time-dependent discrete sources and surroundings (Cobble), 453
Computer computations, errors, in structural analysis of. Error analysis in structural computations (Rubinstein & Rosen), 37
Constant speed tearing of a strip. Moving cracks in a finite strip under tearing action (Sih & Chen), 25
Control systems. Final value control of nonlinear composite distributed and lumped-parameter systems (Tzafestas), 439
Control theory. An application of functional analysis to time optimal control of linear discrete systems with output constraints (Kranc & Shilman), 137
Cosmic radiation. Cosmic radiation in the Polar Cap (Pomerantz), 207
Cosmic ray anisotropies. Cosmic radiation in the Polar Cap (Pomerantz), 207
Cosmic ray intensity variations. Cosmic radiation in the Polar Cap (Pomerantz), 207
Cosmic ray modulation. Cosmic radiation in the Polar Cap (Pomerantz), 207
Crack moving in a strip. Moving cracks in a finite strip under tearing action (Sih & Chen), 25
Cybernetics. Decomposition of simple goal-seeking automata (Yeh), 419

D

Decomposition, partial, for structural analysis. Structural analysis by partial decomposition (Rubinstein & Simonce), 429
Delayed time failures: On the prevention of delayed time failures of aerospace pressure vessels (Tiffany), 567
Design considerations. Design considerations in the choice of materials (Harris), 583
Design philosophy. Implications of the behaviour of advanced composite materials (Ashton), 549
Differential equations. Least squared approximation methods for solving certain nonlinear differential equations characterizing some electric circuits and other nonlinear physical systems (Garde), 1
Qualitative analysis by modern methods of a stability problem in power-system analysis (Fagiuoli & Szegö), 103
Discrete and distributed sources in composite media. Heat transfer in composite media subject to distributed sources and time dependent discrete sources and surroundings (Cobble), 453
Distributed-parameter control. Final-value control of nonlinear composite distributed and lumped-parameter systems (Tzafestas), 439
Distributed systems, state estimation for- On state estimation for distributed parameter systems (Meditch), 49
Driving point impedance. Bounds on the driving point impedance of equivalent LC networks whose elements lie within known tolerances (Troop), 131
Dynamic stability of plates. Stability of circular plates subjected to moving loads (Mote, Jr.), 329

E

Elasticity. Study of birefringent coatings treated as thick plates (Amba-Rao), 409
Electrical network theory. Bounds on the driving point impedance of equivalent LC networks, whose elements lie within known tolerances (Troop), 131
Electric power systems. Qualitative analysis by modern methods of a stability problem in power-system analysis (Fagiuoli & Szegö), 103
Electrodynamics. The electromagnetic response of a zero spin fermion (Lawson), (BC), 467
Electrostatic fields. Constrained synthesis of electrostatic fields (Yavin & Even), (BC), 161
Electrostatics. Five charges on a sphere (Marx), (BC), 71
Enzyme kinetics. Combinatorial analysis of a chemical network (Sellers), 113
Error analysis, in structural computations. Error analysis in structural computations (Rubinstein & Rosen), 37
Estimation, for distributed systems. On state estimation for distributed parameter systems (Meditch), 49

F

Finite element analysis. Finite element analysis in brittle material design (Gallagher), 523
Flight mechanics. Modification of Leitmann's optimum pursuit problem (Bhattacharya & Bhattacharjee), (BC), 61
Fracture. Implications of the behavior of advanced composite materials (Ashton), 549
Fracture. The use of emerging materials (Tsai & Lovelace), 487
Fracture mechanics. On the prevention of delayed time failures of aerospace pressure vessels (Tiffany), 567
Fracture prevention. Nondestructive tests as an aid to fracture prevention mechanics (Hastings), 589

VOL
29c
197

Fracture strength. Fracture strength of relatively brittle structures and materials (Irwin), 513
Fundamental circuit matrix. On the realizability of fundamental circuit matrices (Kajitani), 355

G

General systems. Decomposition of simple goal-seeking automata (Yeh), 419
Geomagnetic field variations. Magnetic field variations in the Polar Cap (Lebeau), 297
Graph theory. Enumeration of spanning trees containing given subgraphs (O'Neil), (BC), 389

H

Heat transfer in composite media. Heat transfer in composite media subject to distributed sources and time-dependent discrete sources and surroundings (Cobble), 453

I

Input–output properties. Input–output properties of multiple-input, multiple output discrete systems, Parts I and II (Desoer & Wu), 11, 85
Integration. On integrals of a class of measurement functions (Stalford & Leitmann), (BC), 155
Ionosphere (Polar). Solar particle effects on Polar Cap VLF propagation (Oelbermann, Jr.), 281

L

Linear algebra. Combinatorial analysis of a chemical network (Sellers), 113
Linear discrete systems. Input–output properties of multiple-input, multiple-output discrete systems, Part I (Desoer & Wu), 11
Logical function. On the realizability of fundamental circuit matrices (Kajitani), 355
Low-cycle fatigue. The role of ductility, tensile strength and fracture toughness in fatigue (Manson & Hirschberg), 539

M

Mapping of the Polar Cap ionosphere. Mapping of the Polar Cap ionosphere by solar and magnetospheric particles (Hakura), 263
Materials. Implication of the behavior of advanced composite materials (Ashton), 549
Mechanical vibration of bar. A note on disturbances in a "hereditary bar" placed in a magnetic field (Sinha), (BC), 149
Metal fatigue. The role of ductility, tensile strength and fracture toughness in fatigue (Manson & Hirschberg), 539
Metal forming. On the drawing process of thin-walled tubes of anisotropic material (Bratt & Adami), 345
Moving crack. Moving cracks in a finite strip under tearing action (Sih & Chen), 25

N

Network sensitivity. Bounds on the driving point impedance of equivalent LC networks whose elements lie within known tolerances (Troop), 131
Nondestructive testing. Nondestructive tests as an aid to fracture prevention mechanics (Hastings), 589
Nonlinear discrete systems. Input–output properties of multiple-input, multiple-output discrete systems—Part II (Desoer & Wu), 85

O

Optimal control. An application of functional analysis to time optimal control of linear discrete systems with output constraints (Kranc & Shilman), 137
On integrals of a class of measurable functions (Stalford & Leitmann), (BC), 155
Optimal estimation, distributed systems. On state estimation for distributed parameter systems (Meditch), 49
Optimization techniques. Modification of Leitmann's optimum pursuit problem (Bhattacharya & Bhattacharjee), (BC), 61
Optimum control. Final-value control of nonlinear composite distributed and lumped-parameter systems (Tzafestas), 439

P

Plasma physics. The electromagnetic response of a zero-spin fermion (Lawson), (BC), 467
Plasticity. On the drawing process of thin-walled tubes of anisotropic material (Bratt & Adami), 345
Polar. Scintillation effects on satellite signals observed through the Polar ionosphere (Aarons, Müller & Zuckerman), 315
Polar Cap. Atomic processes in the Polar Cap (Green & Strickland), 227
Polar Caps. The energetic-particle environment of the Polar Caps (Reid), 197
Polar Cap physics. Magnetic field variations in the Polar Cap (Lebeau), 297
Polar ionosphere. The Polar Cap as a distinct geophysical entity (Silverman), 179
Polar regions. The Polar Cap as a distinct geophysical entity (Silverman), 179
Pressure vessel analysis. On the prevention of delayed time failures of aerospace pressure vessels (Tiffany), 567

VOL.
290
1970

Pulse input. Bounded-wave transmission in non-uniform lines for pulse input (Tagata), (BC), 393

Q

Quantum statistical mechanics. The electromagnetic response of a zero-gain fermion (Lawson), (BC), 463

R

Radio propagation. Solar particle effects on Polar Cap VLF propagation (Oelbermann, Jr.), 281

Realizability. On the realizability of fundamental circuit matrices (Kajitani), 355

S

Scintillations. Scintillation effects on satellite signals observed through the polar ionosphere (Aarons, Müller & Zuckerman), 315

Sensitivity of active-distributed network. An analytic approach to low sensitivity design of active distributed RC networks (Bello & Ghausi), 365

Sensitivity of dominant poles in active-distributed networks. An analytic approach to low sensitivity design of active distributed RC networks (Bello & Ghausi), 365

Solar cosmic rays. Cosmic radiation in the Polar Cap (Pomerantz), 207

Solar disturbances. Solar particle effects on Polar Cap VLF propagation (Oelbermann, Jr.), 281

Structural analysis by partial decomposition. Structural analysis by partial decomposition (Rubinstein & Simonce), 429

Space physics. The energetic-particle environment of the Polar Caps (Reid), 197

Stability. Input–output properties of multiple-input, multiple-output discrete systems, Parts I & II (Desoer & Wu), 11, 85

Stability. The whirling motion of elastic shafts with internal damping (Pipes), (BC), 67

Strength of adhesive joints. The physical basis of adhesion (Orowan), 493

Strength of materials. Fracture strength of relatively brittle structures and materials (Irwin), 513

Stress corrosion. On the prevention of delayed time failures of aerospace pressure vessels (Tiffany), 567

Structural analysis. Finite element analysis in brittle material design (Gallagher), 523

Structural computations, error analysis of. Error analysis in structural computations (Rubinstein & Rosen), 37

Sufficiency theorems. On integrals of a class of measurable functions (Stalford & Leitmann), (BC), 155

Surface energy. The physical basis of adhesion (Orowan), 493

Symmetry for stable equilibrium. Five charges on a sphere (Marx), (BC), 71

T

Theory of stability. Qualitative analysis by modern methods of a stability problem in power-system analysis (Fagiuoli & Szegö), 103

Thick plates. Study of birefringent coatings treated as thick plates (Amba-Rao), 409

U

Upper atmosphere. Magnetic field variations in the Polar Cap (Lebeau), 297

Upper atmospheric physics. Atomic processes in the Polar Cap (Green & Strickland), 227

V

Vibration of plates. Stability of circular plates subjected to moving loads (Mote, Jr.), 329

Vibration of strings. Dynamic response of single cables with initial sag (Soler), 377

Vibrations. The whirling motion of elastic shafts with internal damping (Pipes), (BC), 67

Viscoelasticity. A note on disturbances in a "hereditary bar" placed in a magnetic field (Sinha), (BC), 149

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.
